EDUCATION

Michigan State University East Lansing, MI
Bachelor of Science in Economics; Minor in Quantitative Data Analysis Expected December 2026
Coursework: Econometrics (EC 420), Data and Visualization (EC 242), Survey of Accounting Concepts (ACC 230)

TECHNICAL AND ANALYTICAL SKILLS

Inventory and Assets: Inventory reconciliation, asset verification, discrepancy investigation, spending analysis, KPI reporting
Excel: VBA, PivotTables, XLOOKUP/VLOOKUP, CSV consolidation, automated reporting, dashboards
Analytics: SQL (joins, aggregations, window functions), R (tidyverse, ggplot2), Python, Stata, data cleaning and visualization
Microsoft Office: Excel, Word, PowerPoint; written reports and management presentations
Languages: English (native), Korean (fluent), Japanese (fluent)

PROFESSIONAL EXPERIENCE

LG Energy Solution Michigan, Inc. Holland, MI
Electrode Production Management Intern May 2026 – August 2026

- Audited assets across the **entire Electrode Consumable Department**, tracing company investment histories to investigate discrepancies and correct improperly assigned asset tags.
- Built an Excel/VBA barcode inventory system tracking **300+ items across 3 supply rooms**; consolidated shared-drive CSV logs into a master workbook, reducing reporting time by approximately **67%** per cycle.
- Automated unit conversions, checkout costs, duplicate-import prevention, and monthly archives; developed dashboards for spending, material usage, low-stock rates, and reorder needs by location.
- Placed **top 3 of 20+ projects** in the internship project competition and presented the system's transaction controls, reporting capabilities, and operational benefits to company directors.

Konica Minolta Business Solutions, Inc. New Hudson, MI
Deployment Team Member June 2025 – August 2025

- Configured **over 100 devices daily**, including Chromebooks, Macs, tablets, and ThinkPads, applying required settings for school and business deployments.
- Completed asset tagging, configuration troubleshooting, quality checks, and shipment preparation to support accurate device identification and timely customer delivery.

PROJECTS

Asset Register Review Tool *JavaScript, CSV/Excel*
Independent Project – Real Seattle Public Data View case study

- Built a browser-based review tool with column mapping, **10 KPIs** (age, condition, audit coverage, maintenance cost, duplicate IDs, completeness), adjustable targets, and exception exports.
- Reviewed Seattle's public equipment register (**4,244 records, $435.6M cost**), flagging **1,453** for follow-up, including **425** with missing or nonpositive cost and **1,072** past their planned replacement year.

Industrial Purchasing and Transaction Controls *SQL, Python, Excel*
Independent Project – Real California Public Data View case study

- Processed **344,504** purchase-order lines and analyzed **14,823** manufacturing, electrical, and tools records (**$217.7M** recorded spend, **1,843** supplier names).
- Built SQL and Python checks flagging **862 records** (repeated lines, bad dates, nonpositive amounts) carrying **$5.9M** (2.7%) of spend; exported traceable exceptions.
- Built a separate synthetic model comparing **3 purchasing policies** on **6 months of held-out demand** (Excel model, dashboard).

Market Regimes and Forward Returns *Python, GitHub Actions*
Independent Project – Public FRED Data View case study

- Built a weekly automated pipeline on **4 FRED series** comparing S&P 500 returns across yield-curve, inflation, and credit regimes over **120 months**; documented limits, including that the inverted-curve result reflects a single episode.

Applied Economic and Business Data Analysis *R, Stata*
Michigan State University – Academic Projects

- Cleaned and reshaped datasets with **thousands of rows** for corporate hotel-spending analysis, Ames housing-price regressions, and ACS commuting comparisons; standardized variables, parsed dates, and assessed missing values.
